- Skilled in version-control using GitHub, GitLab, Bitbucket.
- Expertise in Project management tools such as Jira, Microsoft Azure Devops and Microsoft SharePoint.
- Understanding of app distribution and submission process to the App Store, including using iTunes Connect and TestFlight.

SOLITON TECHNOLOGIES, Lahore, Pakistan.

SEPTEMBER' 19 – OCTOBER' 22

iOS Developer

- Experienced in developing and maintaining iOS apps, including UI designs, integration of APIs, and debugging.
- Pioneered multiple health applications for iOS, implementing features such as audio, video and group calling.
- Designed and implemented features like user profiles, chat functionality, and push notifications.
- Enacted data storage and retrieval mechanisms using Core Data or third-party libraries, ensuring efficient data management in the applications.
- Stayed up-to-date with the latest iOS development trends and best practices, continuously improving skills and applying new technologies to enhance app functionality.
- Utilized Swift and SwiftUI programming languages, along with Apple's development frameworks and APIs, to build robust and user-friendly iOS applications.
- Established responsive and adaptive designs, ensuring compatibility across various iOS devices and screen sizes.

PROJECTS

⇒ iOS

• [Persivia Care Provider](#)

Collaborated with a diverse team of 10 professionals, including our esteemed USA client, to develop the Persivia Care Provider App tailored for the USA market. This dynamic health sector platform connects users from different practices, fostering engaging conversations and diverse interactions. Experience seamless and personalized audio video calling, appointment booking system and patient clinical records management system with intuitive interface, enhancing user experience. Boasting a user base of 500+, the Persivia Care Provider App is redefining record management in health sector, cultivating a community of shared ideas and connections.

• [LEAP](#)

Collaborated with a dynamic team of 15 professionals to develop and design features for the LEAP app. Enriching users with seamless communication with primary care providers, lab results review, clinical records view, and efficient appointment management. Integrated virtual healthcare functionalities, including online payment and virtual consultations, to enhance user experience and accessibility. With an expected user base of approximately 10,000+ users, our app will revolutionize healthcare sector for patients.

• [Persivia Patient Care](#)

Collaborated with team of 10 members to successfully develop and launch a groundbreaking Persivia Patient Care app on the App Store tailored for the USA market. Inspiring patients with management of their health records, including Clinical records, appointment booking system and communication with providers using audio, video calling and chat. With an ever-growing user base of over 1,000 users, our app revolutionizes patient's healthcare management.

LEADERSHIP ROLES

- As a visionary leader, I conducted different events including a plethora of captivating indoor and outdoor competitions that brought individuals together, fostering camaraderie and healthy competition. Additionally, I managed Programming Competition in well-known Softec Event.

TECHNICAL SKILLS

Programming Languages: Swift, SwiftUI, Objective-C, SQL

Frameworks: iOS Native (UIKit and SwiftUI).

- **IDE(s):** Xcode, Microsoft VS Code, Atom, Postgres

Software: Jira, Postman, SourceTree, Adobe Photoshop.

Database Management: MySQL, Microsoft SQL Server Management, Microsoft Access, MongoDB.

SKILL SET – iOS

Swift Package Manager, Combine Framework, Core Data, SwiftUI Animations, Advanced Memory Management, Protocol-Oriented Programming, Augmented Reality (ARKit), Firebase, GraphQL, Testing and Debugging.
